1. The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is well-posed in the sense of Hadamard. The second part is devoted to the construction of the solution. The third part is devoted to the study of the properties of the solution. The fourth part is devoted to the study of the stability of the solution. The fifth part is devoted to the study of the convergence of the series. The sixth part is devoted to the study of the asymptotic behavior of the solution. The seventh part is devoted to the study of the singularities of the solution. The eighth part is devoted to the study of the analytic continuation of the solution. The ninth part is devoted to the study of the integral representation of the solution. The tenth part is devoted to the study of the differential equations satisfied by the solution. The eleventh part is devoted to the study of the boundary value problems. The twelfth part is devoted to the study of the initial value problems. The thirteenth part is devoted to the study of the Cauchy problem. The fourteenth part is devoted to the study of the Dirichlet problem. The fifteenth part is devoted to the study of the Neumann problem. The sixteenth part is devoted to the study of the mixed problem. The seventeenth part is devoted to the study of the problem of the determination of the solution from the boundary values. The eighteenth part is devoted to the study of the problem of the determination of the solution from the initial values. The nineteenth part is devoted to the study of the problem of the determination of the solution from the boundary and initial values. The twentieth part is devoted to the study of the problem of the determination of the solution from the boundary, initial and final values.
